

Ready, Set, Grow!

Facilitated Field Trip experience for 1st Graders

Facilitated Field Trip Highlights:

- 90-min. outdoor program includes 3 hands-on learning stations.
- Revamped grade-specific STEAM curriculum.
- Experiential learning in a living museum lead by an IBG facilitator.

Ready, Set, Grow! Field Trip Experience:

- Students will learn about concepts and participate in hands-on activities that relate to Idaho Content Standard: Life Science (1-LS-1.1)

Station 1:

- Students will learn about different plant characteristics that allow plants to survive by helping them meet their needs and protecting themselves.

Station 2:

- Students will learn about the function of different plant parts and then apply their knowledge by labeling parts of plants in our Vegetable Garden.

Station 3:

- Students will learn about plant parts found underground and how they help the plant survive and grow.

Idaho Content Standard

1-LS-1.1 Students who demonstrate understanding can: Design and build a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.

LS1.A: Structure and Function: All organisms have external parts. Different animals use their body parts in different ways to see; hear; grasp objects; protect themselves; move from place to place; and seek, find, and take in food, water, and air. Plants also have different parts (roots, stems, leaves, flowers fruits) that help them survive and grow.
